Mountain Weather Forecast

Ground Conditions Supplement
Date: Sunday 27 March Location: Skiddaw Summit at 12:45 . Full report: The current high pressure weather system which has brought sunshine and light winds to the Lake District fells has now been has now been in place for 10 days. Unfortunately the end is now in sight and conditions are forecast to turn more wintery from Wednesday afternoon with snow on the summits. Ground conditions remain largely dry and the fells and paths are almost entirely snow-free with the exception of a few small patches which can be found dotted around north and east-facing corrie rims above roughly 900m. Suncream and plenty of fluids are recommended for anyone heading out into the fells in the next couple of days. There is also a heightened fire risk so please take extreme care with any BBQs, camping stoves or cigarettes.
Please continue to check the weather forecasts as conditions begin to deteriorate this week and go prepared with the correct warm & waterproof clothing and a map & compass for navigation. Temperature: plus 13.2 C, Maximum wind speed 7.1mph, Wind chill: plus 7.1 C, Average wind speed: 5.0 mph.
